# Grain Market News

## QUARTERLY SUMMARY AND STATISTICS

GRAIN DIVISION

CONSUMER AND MARKETING SERVICE

UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 9 No. 1

I.F.A. Hyattsville, Maryland 20782

January 27, 1966

Grain prices advanced moderately during the October-January period reflecting in part the good export demand and generally favorable feeding ratios for feed grains. Grain prices in January were mostly above a year ago with the exception of grain sorghum, soybeans and flaxseed. Stocks of feed grains on January 1 were 4 percent above a year ago but less than the 5-year average. Wheat stocks were the smallest in 12 years while soybean stocks were 18 percent above the previous record two years earlier.

WHEAT ... prices generally advanced in the October-January period with the greatest increase for soft red winter. Prices of this class went up 12-15¢ per bushel due in part to the good export demand and relatively short supplies. Hard winter in the Midwest, and white wheat in the Pacific Northwest gained 4-5¢ per bushel. Spring wheat advanced only 1¢ for ordinary protein and 3-4¢ for the higher protein grades. Stocks of wheat in all positions, January 1, totaled 1,339 million bushels, 110 million less than a year earlier and the smallest since 1954. Of the total stocks 753 million were either owned by Commodity Credit Corporation or under loan. Farmers put 150 million bushels of 1965-crop wheat under price support through December 31 -- 14 million less than a year earlier. Exports of wheat and flour, July through December, totaled 393 million bushels, slightly above last year's record. Milling of wheat for flour at about 300 million bushels was a little more than a year earlier but below average. Wheat supplies in Canada for 1965-66 total 1,193 million bushels -- 133 million more than for 1964-65. Canadian exports of wheat and flour totaled a record 280 million bushels August through December this season as against 197 million the same months of 1964.

RYE ... prices thus far this season averaged 9¢ per bushel below the same months a year earlier due in part to the larger supplies and only moderate exports. However, prices in January at Minneapolis were 6¢ per bushel above a year ago. Rye stocks of 28.5 million bushels were 34 percent above last year. Exports of 1.5 million bushels were somewhat more than the previous year but sharply below the 5-year average. Consumption of rye for alcohol and for milling the first half of the season was about the same as last year and the average. CCC owned stocks of 5.7 million bushels were sharply above recent years.

CORN ... prices generally advanced during the October-January period despite the record crop. Record exports and favorable feeding ratios provided strength to the market. Prices at principal terminals the first three weeks of January averaged 12¢ per bushel above October and 3¢ above January 1965. Farm prices, October-December this season were 5¢ below the same months last season. Stocks of corn in all positions on January 1 totaled 4.1 billion bushels. This is 143 million more than last year but 326 million less than the 5-year January 1 average. Of the total stocks, CCC owned 530 million with an additional 458

million under loan or resale. Exports of 188 million bushels of corn the first quarter were the largest of record. The wet milling industry also used a record 51 million bushels of corn. Around 995 million bushels of corn were fed the first quarter -- 40 million above last year and 85 million above average. The number of grain consuming animal units fed in 1965-66 is currently estimated at 168 million compared with 167.3 million in 1964-65 and 169.5 the 5-year average. On this basis 5.9 bushels of corn were fed per animal unit the first quarter this season as against 5.7 last season and 5.4 bushels the average.

CATS ... prices advanced during the October-January period reflecting in part the large exports. Market prices in January were around a penny below a year ago. Stocks of cats on January 1 totaled 783 million as against 710 million on January 1, 1965. Disappearance the first half of the season, mainly for feed totaled 460 million -- the smallest in recent years. Exports of nearly 22 million were the second largest in 25 years of record and compare with less than 3 million last year.

BARLEY.... prices at the farm, October-December, averaged nearly 6¢ per bushel above the same months in 1964. Market prices for choice malting barley at Minneapolis in January were 8¢ above a year ago while feed barley was 16¢ higher at Portland but only 2¢ higher at Los Angeles. Stocks in all positions on January 1 at 313 million were the second smallest since 1957 -- 2 million more than a year ago. Disappearance of 204 million the first half of the season was the smallest since 1954. Exports of 36 million were 4 million above last year but 4 million below average. While industrial usage, mainly for beer was at last year's high level, consumption for feed totaled only 115 million as against 150 million the year before.

GRAIN SORGHUM ... prices at the farm for October-December averaged 13¢ per cwt. below a year earlier reflecting the record production and continued large stocks. Market prices in January were 17-18¢ per cwt. below a year earlier. Stocks of 554 million cwt. on January 1 were 20 million above last year but slightly below average. Of the total stocks, CCC owned 276 million with an additional 61 million cwt. under loan or resale. Exports of 27 million cwt. the first quarter was the largest of record, nearly double last year or the average. The quantity remaining for feed at 107 million cwt. was 18 million above a year earlier.

SOYBEAN ... prices at Illinois points for October through January averaged 17¢ per bushel below a year earlier reflecting the largest crop of record. Prices at these points in January were 11¢ below January 1965. Stocks of 619 million bushels on January 1 were 92 million more than a year ago. Crushings of 172 million, September through December, and exports of 104 million were both well above the record of a year ago. Through December 31 farmers had put 67 million bushels of 1965-crop soybeans under price support as against only 18 million a year earlier.

FLAXSEED ... averaged \$3.01 per bushel at Minneapolis the first part of January compared with \$3.11 in July and \$3.18 a year ago. Flaxseed stocks of 32 million are 9 million more than a year earlier. Exports of flaxseed, July-December, of 3.2 million were only half those of last season. Crushings of about 11 million were slightly below the same months of 1964. Farmers put 8.5 million bushels of flaxseed under price support by the end of December as against 6 million a year earlier. -

-----

NOTE: Data on stocks, production and seed usage from Crop Reporting Board; imports, exports, quantity milled or processed from Census Bureau; and alcohol usage from Internal Revenue Service. Production and stocks for 1964 and 1965 are preliminary. October-December 1965 data are partly estimated. Since the statistics are preliminary and subject to revision and represent data reported by several independent sources, no attempt is made to force a balance between supply and reported disappearance.

# GRAINS: MONTHLY AVERAGE CASH PRICES

(All prices in cents per bushel except grain sorghum in cents per cwt.)

1/ Owned and stored in bins or other storage owned or controlled by CCC. Additional CCC-owned grain is included in other positions.

2/ All off-farm storages not otherwise designated.

3/ Does not include Canadian wheat milled in bond, but includes about 10,000,000 bushels of wheat used annually for breakfast food.

4/ Mostly quantity fed, but includes industrial use, waste, loss, and statistical errors in estimates.

Rye: Supply and distribution, 1959-65
